

Silicone Keyboard

Your Keyboard Could Be Making You Sick:

There has been a lot of press lately on the bacteria harboured by traditional keyboards that include single celled organisms that cause strep throat, pneumonia, urinary tract infections and other conditions. CNN reported that in a study conducted by microbiologist, Dr Charles Gerba at the University of Arizona, it was found that **the average office toilet seat had 49 germs per square inch compared to the computer keyboard which is home to 3,295 germs per square inch.**

Gerba added that coughing and sneezing can leave behind "a minefield of viruses" that can live on a surface for up to three days but wiping down surfaces with disinfectant wipes can reduce bacteria significantly. This is very difficult to do on conventional keyboards. **Kleen Keys can be cleaned and disinfected without damage.**

Features:

Sealed High Quality Silicone ♦ Water Resistant ♦ Soft and Flexible ♦ Flat Design

Benefits:

- ♦ Can be washed with soap and water and non corrosive cleaners ♦ Can be disinfected ♦ Can be used in damp or dusty environments ♦ Repels beverage spills and food crumbs
- ♦ Provides strong, silent keystrokes ♦ Can be rolled for easy storage and portability
- ♦ Reduces negative angle stress to the wrist ♦ Virtually indestructible

Everyone is a Potential Customer:

Hospitals ♦ Clinics ♦ Medical Labs ♦ Pharmacies ♦ School Computer Labs ♦ Telephone Call Centres
♦ Industrial Plants ♦ Warehouses ♦ Machine Shops ♦ Mechanics/Garages ♦ Offices ♦ Homes ♦ Restaurants
Librariesanywhere dirt, moisture, noise or germs are a concern!

Cynthia Colby, Creative Communications

"As a speed typist, I need a keyboard that doesn't inhibit my speed, yet is comfortable to use. It took only a short while to get used to the feel and lowered height of the Kleen Keys, and my fingers were once again flying over the keys. I love the idea of having a keyboard that can be cleaned and sanitized: no more trying to blow dust from under stuck and sticking keys. Just roll it up, take it to a sink, and wash it off. Comfortable, convenient and clean – it covers all the bases for me."

The Kitchener YMCA Front Desk

Hayley, Supervisor Membership Sales and Service *"I like the fact that they can be washed with soap and water as it eliminates having to air spray the keys."*

Rhonda, *"Sleek and modern and tucks away easily...real spacesavers."*

Kim, *"Great for families with kids. Even though I don't allow the kids to eat at the computer, somehow they still get the keyboard grungy."*

Paul, *"Really like how quiet the keyboard is."*

Tricia, *"When you have to work on a shared keyboard, it is great that you can wash and disinfect it. Lots of our members commented on it and asked where they could buy it."*
